CONFORMITY TO THE REGULATION ON ENVIRONMENTAL LABELING

INFORMATION RELATING TO THE COMPOSITION OF THE PACKAGING SUPPLIED

References

- 1) Legislative Decree 116/2020 of the 3rd of September 2020
- 2) Directive 1994/62/EC directive (EU) 2018/851 amending directive 2008/98/EC on waste and implementation of directive (EU) 2018/852 amending directive 1994/62/EC on packaging and waste of packaging.

General conditions

The legislation in object provides that all packaging is appropriately labeled, according to the methods established by the applicable UNI technical standards and in compliance with the decisions adopted by the Commission of the European Union, to facilitate the collection, re-use, recovery and recycling of packaging, as well as to give correct information to consumers on the final destinations of the packaging. The producers also have the obligation to indicate, for the purposes of identification and classification of the packaging, the nature of the packaging materials used, on the basis of Commission decision 97/129/EC.

Packaging intended for B2B may not present the information relating to the final destination of the packaging, but must mandatorily report the coding of the materials of composition in accordance with Decision 129/97/EC.

As an alternative to the physical application of the labeling on the packaging, the information can be made available through digital channels, for example Transport documents or other documentation accompanying the goods; these documents may refer to digital channels for making information available

Through this document, 2B Minerals S.r.l., which operates in the B2B sector, provides its customers with the information required for the environmental labeling of the packaging used for its products.

Characteristics of the packaging supplied by 2B Minerals S.r.l.

The following table specifies the codes of the materials constituting all the packaging used, according to the type of packaging requested by the customer. The materials for the composition of the pallet used for material handling are therefore indicated.

The following table can always be consulted and downloaded from the "Documents" page on our website www.2bminerals.it
